

Land improvements

To protect you from the vagaries of the weather and overvoltage...land improvements

From 6 to 8 teams in land improvement, from 4 to 12 teams in land measurements, 10 teams permanently in the land areas, and up to 12 teams can be mobilized

it is the possibility of more than 1200 measurements and 120 improvements per week...

The C&M company realize projects in a few weeks.

Report with photos and GPS coordinates

We measure the land of your MV-LV installations, with a digital land controller (CA 6462), with regular calibration certificate at your disposal.

We provide you with a full data report, with GPS coordinates and digital photos of each point measured.

Land Improvement

We realize your Land improvement works, by making trenches with copper coil+ copper stakes, as well as drilling.

Our staff is electrical ability. His accreditation “TST-BT-BRT-AER” allows him to realize your work of creation new land and connections to your aerial network.

We provide you with a full data report, with GPS coordinates and digital photos of each improved point.
